

Baby Book

themes/examples

Just a quick note:

These are all examples, but the options are endless.

Whatever your theme, style, or idea-we can use that to create the perfect book to tell your little one's story.

If you like multiple themes, we can combine them as well.

For example, there are several watercolor sets, we can use them across the pages for one big watercolor theme.

Send me pictures/screenshots of other ideas you have that aren't included in here.

Some other ideas I've thought of are floral, nautical, and minimalist abstract shapes and colors (similar to the front page).

Can't wait to see what you come up with!
